

CONSTRUCTION PERMIT INSTRUCTIONS

All information is required under the Commonwealth of Pennsylvania Uniform Construction Code Act No. 45 of 1999

1. Construction permit application(s) are to be completed, signed and dated.
2. Two (2) sets of building plans and/or specifications (if required) are to be submitted with the application for residential construction projects. Three (3) sets of building plans and/or specifications are to be submitted with the application for commercial construction projects. Building plans may be waived at the discretion of the Building Official if work is minor in nature. Information required on building plans is outlined on the "Construction Drawings Requirements" included in this package.
3. A site plan (survey) shall be submitted with the application.
4. The Municipality must sign-off on the Zoning, Historical District and Flood Hazard form.
5. Provide proof of Workers Compensation Insurance or complete the addendum application stating that the work will be done solely by owner or by contractor without any employees.
6. Complete Energy Code Compliance form.
7. Sign OSHA Safety Standards Signoff form.
8. Return application with items to the zoning office.

NOTE: This list is not all inclusive and Allegheeny Township reserves the right to add, delete and change this requirement list at any time. Additional information may be required by Allegheeny Township in order to approve and issue a permit

CONSTRUCTION DRAWINGS REQUIREMENTS

Drawings should be drawn to scale and shall provide the necessary information to verify compliance with the Pennsylvania Uniform Construction Code.

Two (2) sets of building plans and/or specifications shall be submitted for residential construction projects. Three (3) sets of building plans and/or specifications shall be submitted with the application for commercial construction projects.

All construction drawings shall include the following information:

- **Site Plan Drawing:** The construction documents submitted with the application for permit shall be accompanied by a site plan showing the size and location of new construction and existing structures on the site and distances from lot lines. In the case of demolition, the site plan shall show construction to be demolished and the location and size of existing structures and construction that are to remain on the site or plot.
- **Structural Drawings:** To include footing construction detail, foundation construction details, framing construction detail, masonry construction detail, wood construction detail, steel construction detail, stair detail and chimney detail as apply.
- **Foundation Drawings:** To include all applicable dimensions including footing sizes with description of reinforcement (if applicable), layout and description of foundation drain system location of all slabs describing thickness of slab, base, reinforcement, vapor barrier and any slopes.
- **Floor Plans:** To include location and sizes of all doors, windows, closets, decks, plumbing fixtures wall and column sizes, thickness and material. Location and type of insulation. To include the use of all areas and means of egress components.
- **Roof Framing Drawings:** To include size, type, location and anchoring of roof trusses. NOTE: For Pre-Engineered trusses, floor joists and beams, all specifications, bracing and installation instructions must be available at time of inspection.
- **Floor Framing Drawings:** To include same as above, except for floor joists on each floor.
- **Electrical Drawings:** To include all lighting facilities, smoke detectors, GFI and ARC fault protection, outlet box size, electrically operated equipment and electrical circuits required for all service equipment of the building or structure.
- **Mechanical Drawings,** To include size and type of appliances, construction of flues and chimney system, ventilation air provided, fresh air make-up provide and gas shut-off locations.
- **Plumbing Drawings:** To include a plan view and a riser diagram of waste and water piping, pipe sizing, grade of pipe, drainage fixture unit loads on stacks and drains, water distribution design criteria.

LOCATION _____

ALLEGHENY TOWNSHIP BUILDING PERMIT APPROVAL AND ISSUANCE

1. Upon receipt of approved building permit, such building permit must be posted on the job site so it is visible from the street and remain posted until a final inspection has been made. Approved plans must be retained on the job site. Where a Certificate of Occupancy is required, such building shall not be occupied until a final inspection has been made.
2. The approved building permit will become null and void if construction work is not started within 180 days of date the permit is issued as noted on the building permit. Work must be completed within five years of date of issuance.

REQUIRED INSPECTIONS PROVIDED BY ALLEGHENY TOWNSHIP

These inspections may be scheduled by calling Dave McGuigan of the Building Inspection Department, at **412-821-0337 Ext 24**. Kindly give 2 working days advance notice.

Indicates if required

- _____ Footing – prior to pouring but after reinforcement rods are in place
- _____ Foundation/Masonry – before backfilling – walls must be parged and waterproofed with required anchor bolts in place
- _____ Electrical – prior to covering structural members **PERMIT REQUIRED CONTACT FRED DZUGAN @ 412-821-0337 Ext. 36**
- _____ Plumbing – Ground and rough plumbing prior to covering (water or air test)
- _____ HVAC – prior to covering structural members
- _____ Framing – prior to covering structural members, but after HVAC, electrical and plumbing installations. Rough inspection stickers must be on site at this time.
- _____ Wallboard – During the installation of wall coverings
- _____ Final Inspection – prior to occupancy. Electrical and plumbing final inspection stickers must be on site at this time.

NOTICE

ALL PERMITS require a final inspection. Requests for a final inspection must be at least 2 working days notice.

NOTE: Work shall not proceed until the inspector has approved the various stages of construction. Failure to obtain required inspections is a violation of the Pennsylvania Uniform Construction Code.

MUNICIPAL AUTHORITY OF ALLEGHENY TOWNSHIP

Sanitary Sewage Hookup Inspection for New Construction

The purpose for this type of inspection of sanitary sewage line hookups is to stop storm water run off from entering the sanitary sewage system. (This causes damage to the system and higher treatment cost to the customer.) The cost of these inspections will be payable by the property owner to the MAAT along with the sewer tap.

New Construction

1. Inspections of outside and inside foundation French drains from the point of origin to final destination onsite before any type of back filling can be done.
2. Inspection of basement sanitary sewage and floor drains to a point outside the foundation prior to sanitary hookup, before any type of back filling or pouring of concrete can be done.
3. Inspections at the time of the hookup to the sanitary sewage include dye or smoke testing of the inside floor and sanitary drains, before any type of back filling can be done. Down spout or rain gutter outlet testing must show that down spout water comes out at least 10 foot from the foundation.

A final smoke and dye test may be asked for before a new housing plan sewage line can be accepted into the current system. Any misuse of the sanitation system can result in fines to the property owner.
